MOBILITY PATTERNS:

In Bursa, public transit, including buses, accommodates many commuters, but private vehicles remain the main mode of transportation, leading to congestion during peak hours. To combat this, the municipality is enhancing public transport options, increasing bus frequency, and improving ferry services to encourage more sustainable commuting.

Key Interesting Factors

- Industry
- Manufacturing
- Urbanization

Key Areas For Cooperation

- Sustainable Energy
- Sustainable Industry

Topics of Interest

- Business Models and Financing Schemes
- Financing Sustainability Projects

A country associated or potentially associated with Horizon Europe, as a local government from Türkiye Bursa Metropolitan Municipality has signed the European Union's Climate Adaptation Mission Covenant. By doing so, it has committed to strengthening regional and local adaptation efforts and striving towards climate resilience by 2030.

Bursa Metropolitan Municipality signed the Global Covenant of Mayors in 2016, and its Sustainable Energy and Climate Action Plan (SECAP), with monitoring activities now underway.

Commitment to Sustainable Development and Innovative Solutions

COLLABORATION

COORDINATING W/ LOCAL STAKEHOLDERS
COORDINATION W/ INTERNATIONAL PARTNERS
NATIONAL GOVERNMENT

Bursa is a leading city in Türkiye advancing sustainable development through innovative and environmentally friendly projects. Aligned with the Sustainable Energy and Climate Action Plan, Bursa is committed to reducing carbon emissions and increasing the use of renewable energy sources. The city promotes circular economy principles through initiatives such as SMILE CITY, a Horizon Europe project aimed at improving quality of life and fostering sustainable urban practices. Additionally, the Integrated Solid Waste Facilities for Mixed Urban Waste project enhances waste management efficiency and boosts recycling rates. Bursa also supports clean mobility by developing electric vehicle infrastructure through INCIT-EV, another Horizon Europe project, contributing to a greener and more sustainable future.

Bursa is expanding its renewable energy capacity through investments in hydroelectric, solar, and wind energy. Energy efficiency measures and the installation of solar panels are being widely implemented in municipal buildings, particularly at rail system stations. Smart city applications are enabling the sustainable use of natural resources across the city. All these efforts to transform Bursa into a climate-resilient and green city. Bursa Metropolitan Municipality remains firmly committed to building a cleaner and more livable future.
